

Cibatex P303

Cibatex P303 is a methacrylate bead copolymer with medium molecular weight. It is used as a binder in heat seal lacquers.

Applications

- Heat seal lacquers

Properties

- 1- Excellent flexibility.
- 2- Excellent solubility in aromatic, ester, and ketone solvents.
- 3- High gloss.
- 4- Quick drying.
- 5- Good pigment wetting.

Specifications

Property	Value	Unit
Shape	Spherical Bead	-
Mean Particle Size	120	Micron
Tg	31	°C
Molecular Weight	60000	MW
Acid Value	0	Mg KOH/g
Density	0.65	g/cm ³

Packaging

- Multi-layer bags of 25 Kg net.

Storage

- The product should be stored in a dry place at storage temperatures of 10-30 °C.
